Manager Network and Software

Job Responsibilities

- Design, develop, and maintain software applications using .NET frameworks and PHP (Laravel), ensuring they are scalable, efficient, and reliable.
- Work with MySQL databases to design, implement, and optimize efficient database structures, ensuring fast query responses and robust data storage solutions.
- Manage and optimize cloud infrastructure and services on AWS, deploying and maintaining cloud-based solutions.
- Implement and enforce Cyber Security best practices to safeguard applications and data, ensuring high levels of security and compliance.
- Collaborate with cross-functional teams to deliver high-quality solutions and ensure smooth integration of backend systems.
- Troubleshoot and debug software issues, ensuring high performance and responsiveness of applications.
- Mentor and guide junior engineers by providing technical leadership and sharing best practices.
- Install, configure, and maintain Wi-Fi routers, ONUs/OLTs, switches, and MikroTik devices.
- Provide remote support and conduct occasional field visits for resellers.
- Troubleshoot network issues, ensure service uptime, and document problem resolutions.
- Manage PPPoE/RADIUS configurations, VLAN setups, user authentication, and bandwidth control.
- Support network monitoring and routine maintenance for both core and access networks.
- Visit client sites for installation, scheduled maintenance, and emergency troubleshooting.
- Collaborate with cross-functional technical teams to enhance network performance and stability.
- Maintain and manage the School Management Software, ensuring system reliability, timely updates, and user support for all campuses.
- Oversee the School's Official Website, including regular updates of information, announcements, and design improvements.
- Manage online classes and digital learning platforms (Microsoft Teams, Google Classroom, Zoom), ensuring seamless operation and technical assistance to faculty and students.
